

Classique Ideas

Design is where
SCIENCE and ART
break even.

- Robin Mathew -

ABOUT US

Interior designs and construction of interior finishes is a delicate undertaking because of the emotionality of its nature. One has to be a good judge of character and has the ability to explore the implicit taste of the client to provide excellent service. A combination of art, guts, brains and honest hardwork is needed if one has to indulge in interior designs and contracting business.

Ms. Judith R. Villacruis understood this concept clearly. So, sparked by a meager capital, together with her sister Arch. Bazille R. Villacruis, they gave birth to Classique Ideas in the early 1990's.

Maybe it was a woman's intuition or just pure business acumen, they opted to start in trading high-end finishing construction materials to familiarize themselves with the rough waters of this enterprise. And after acquiring enough exposure to architects, engineers, contractors and various technical men in the business, they dived into deeper waters of contracting.

With natural managerial skills, the sisters slowly but surely steered Classique Ideas through adversities inherent in the contracting business. From medium cost residential housing to commercial buildings and eventually five star hotels, Classique Ideas firmly established itself as one of the leading interior contractors in Cebu.

Crisis after crisis shook and threatened the existence of the business but adversity failed to destroy the foundation of Classique Ideas which was built on a noble dream nurtured by hardwork and commitment to provide excellent service.

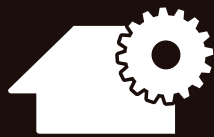

Today, that dream is visible and tangible in Lapu-lapu City, Cebu, where the Classique Ideas building proudly stands gazing toward broader horizons.

Honesty and quality work never fails to spread its word. Classique Ideas' reputation in designing and constructing world class interiors here in Cebu has given rise to clients in Metro Manila and its nearby provinces. To eliminate distance hassles and produce ultimate accessibility, Classique Ideas established a branch office strategically located in Parañaque City.

Acquiring every tool and equipment needed to fabricate the essentials of interiors, Classique Ideas is able to materialize up to the smallest detail of the client's vision for the interior from the simplest residential rooms to the most sophisticated lounges of world-class hotels.

Classique Ideas is able to fabricate mouldings, cornices and wood trimmings using their own 6-head moulder, spindle moulder, and routers. The 6-head moulder can efficiently produce more than enough quality mouldings per day while routers define wood edging's intricate designs. Doors and cabinets, skillfully in-laid with elaborate carvings, are easily constructed and even mass-produced using their own squaring machine and miter saw.

Classique Ideas is also capable of veneering and laminating mouldings, ceilings and even furniture like tables and chairs. The veneer hot press machine, large enough to fit the whole 4' x 8' plywood sheet, has the ability to veneer sufficient plywood sheets per day. All these machineries are set down by Classique Ideas to ensure satisfaction and accuracy of the client's schemes. Indeed, quality is all it could never put at stake.

OUR PROJECTS

01

CATEGORY: WELLNESS

CHI SPA VILLAGE (BORACAY)

Shangri-La Boracay Resort & Spa

The jewel for relaxation of Shangri-La's Boracay Resort and Spa is the 5,714 sqm CHI, The Spa. Located on a rocky peninsula looking out over a private bay, the detached spa village complex is designed to be a sanctuary within the resort.

- ▶
- Reception area shows the natural beauty of veneer, stones and metal
- Hanging bamboo serves as a chandelier and gives a highlight to the area

- ▶
- Suspended ceiling in solid teakwood T & G combined with exposed timber in matte finish
- Therapy pool bordered in stone edge and loose pebble gives a feeling of calmness and freshness

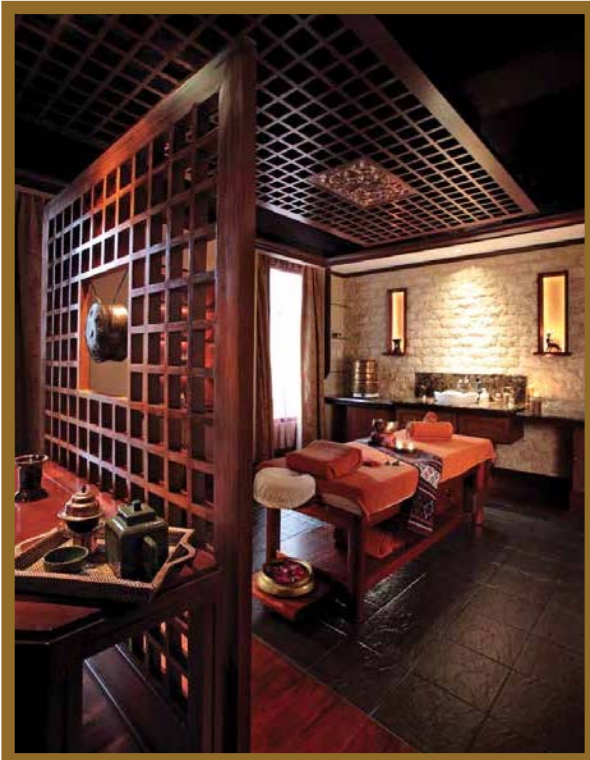

OUR PROJECTS

02

Wooden lattice in stain finish at ceiling and wall combined with T&G flooring gives a relaxing ambiance ▲

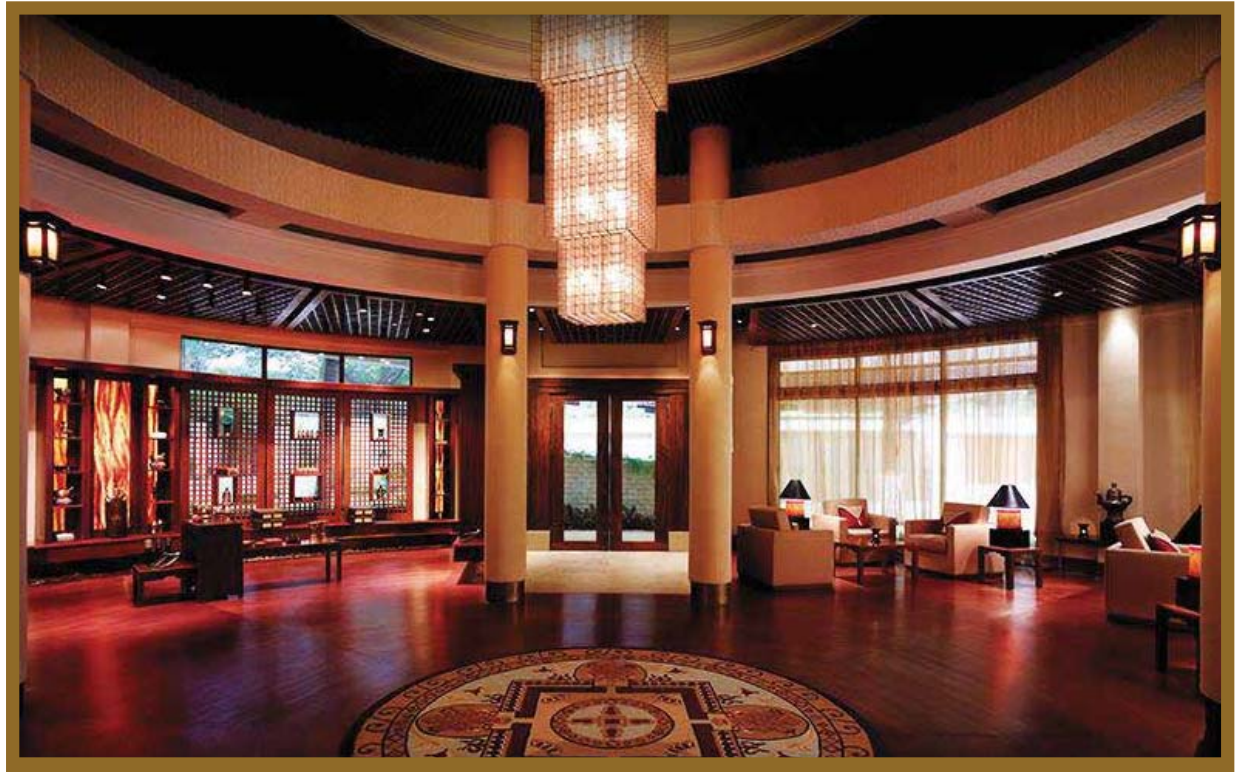

CATEGORY: WELLNESS

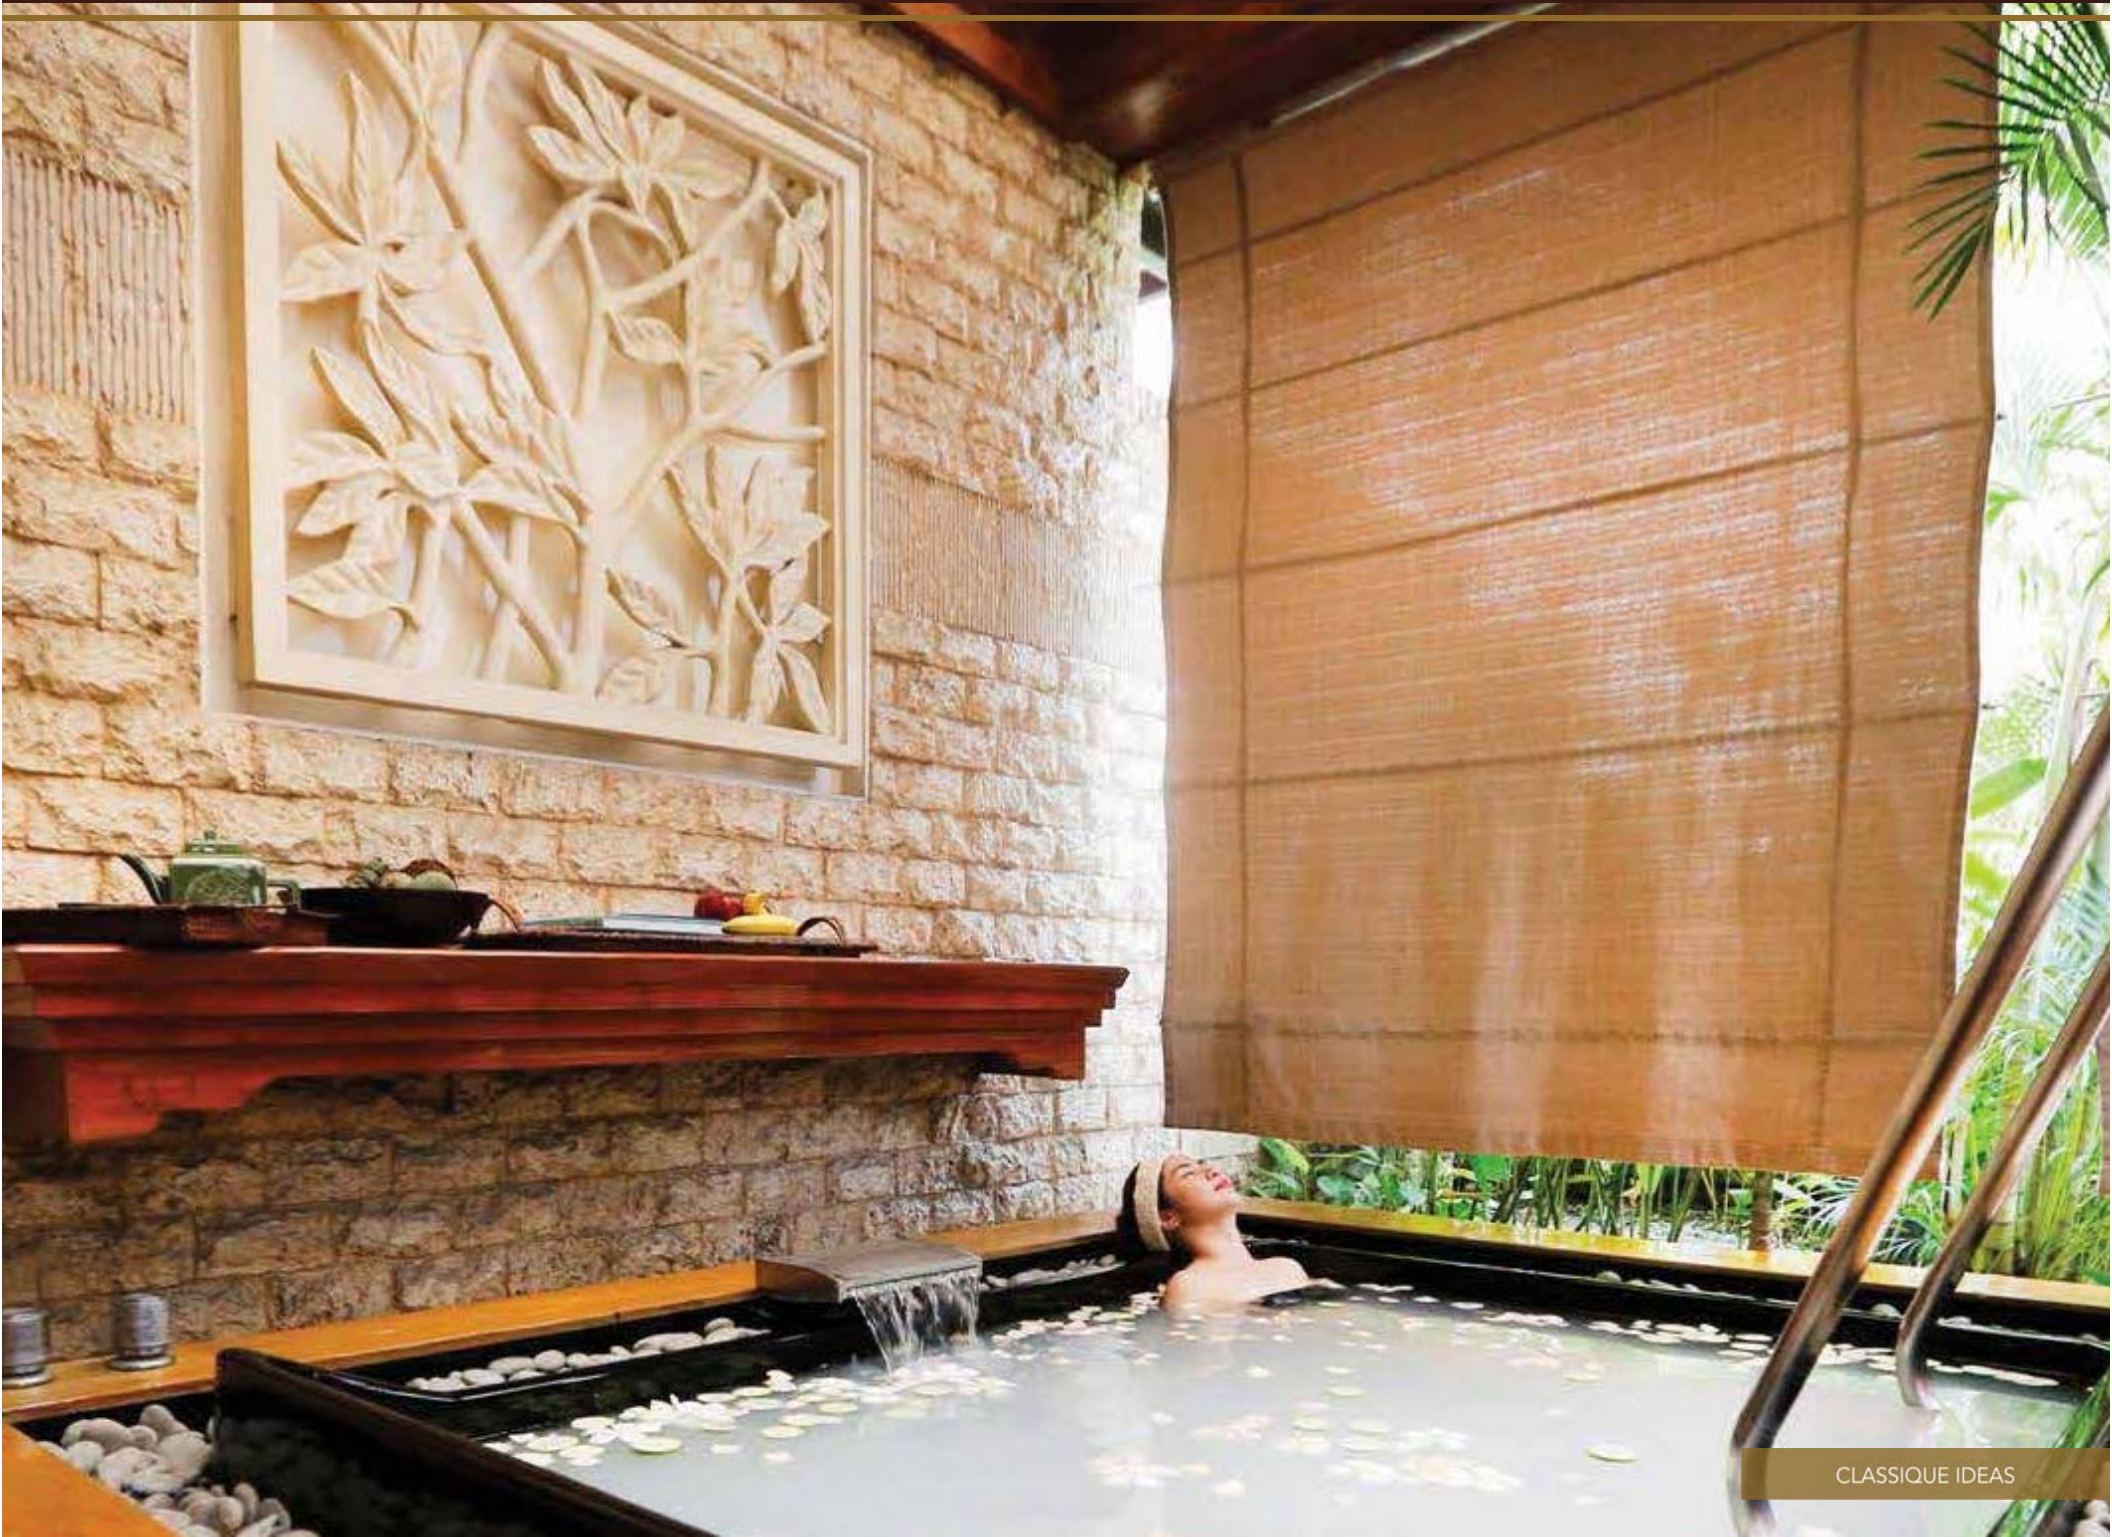

CHI SPA (MANILA)

Edsa Shangri-La

CHI, The Spa at Edsa Shangri-La, covering 3,000 square meters and featuring 10 treatment suites. Its concept is a "spa-within-a-spa," located within the Garden Wing and designed to emphasize personal space.

▲
The brick veneer wall with customized wall carvings made of sandstone

The T & G jointed flooring offers supreme insulation coated with polyurethane wood varnish to exceptional gloss and scratch resistance

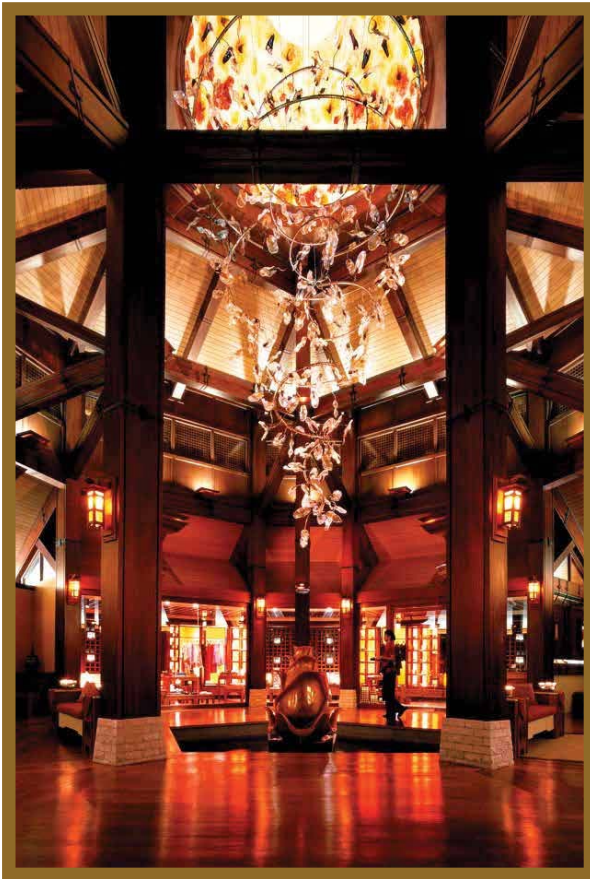

CATEGORY: WELLNESS

CHI SPA VILLAGE (CEBU)

Shangri-La Mactan Island Resort & Spa

CHI Spa Village has six private villas, pavilions for treatments, and garden suites. The Spa Village extends over 10,000 square meters, containing herbal steam rooms and a spa pool.

A combination of yakal doors and T & G teakwood ceiling

▶ The high ceiling in T & G wood finish, clad columns in veneer finish accented with metal and wood flooring all in stain finish establishes calmness and serenity of the spa

- Earth colored teakwood flooring together with the golden padded walls separated by dark wood trimmings emanates Thai ambiance
- The unruffled wood lattice at ceiling and walls unifies the area

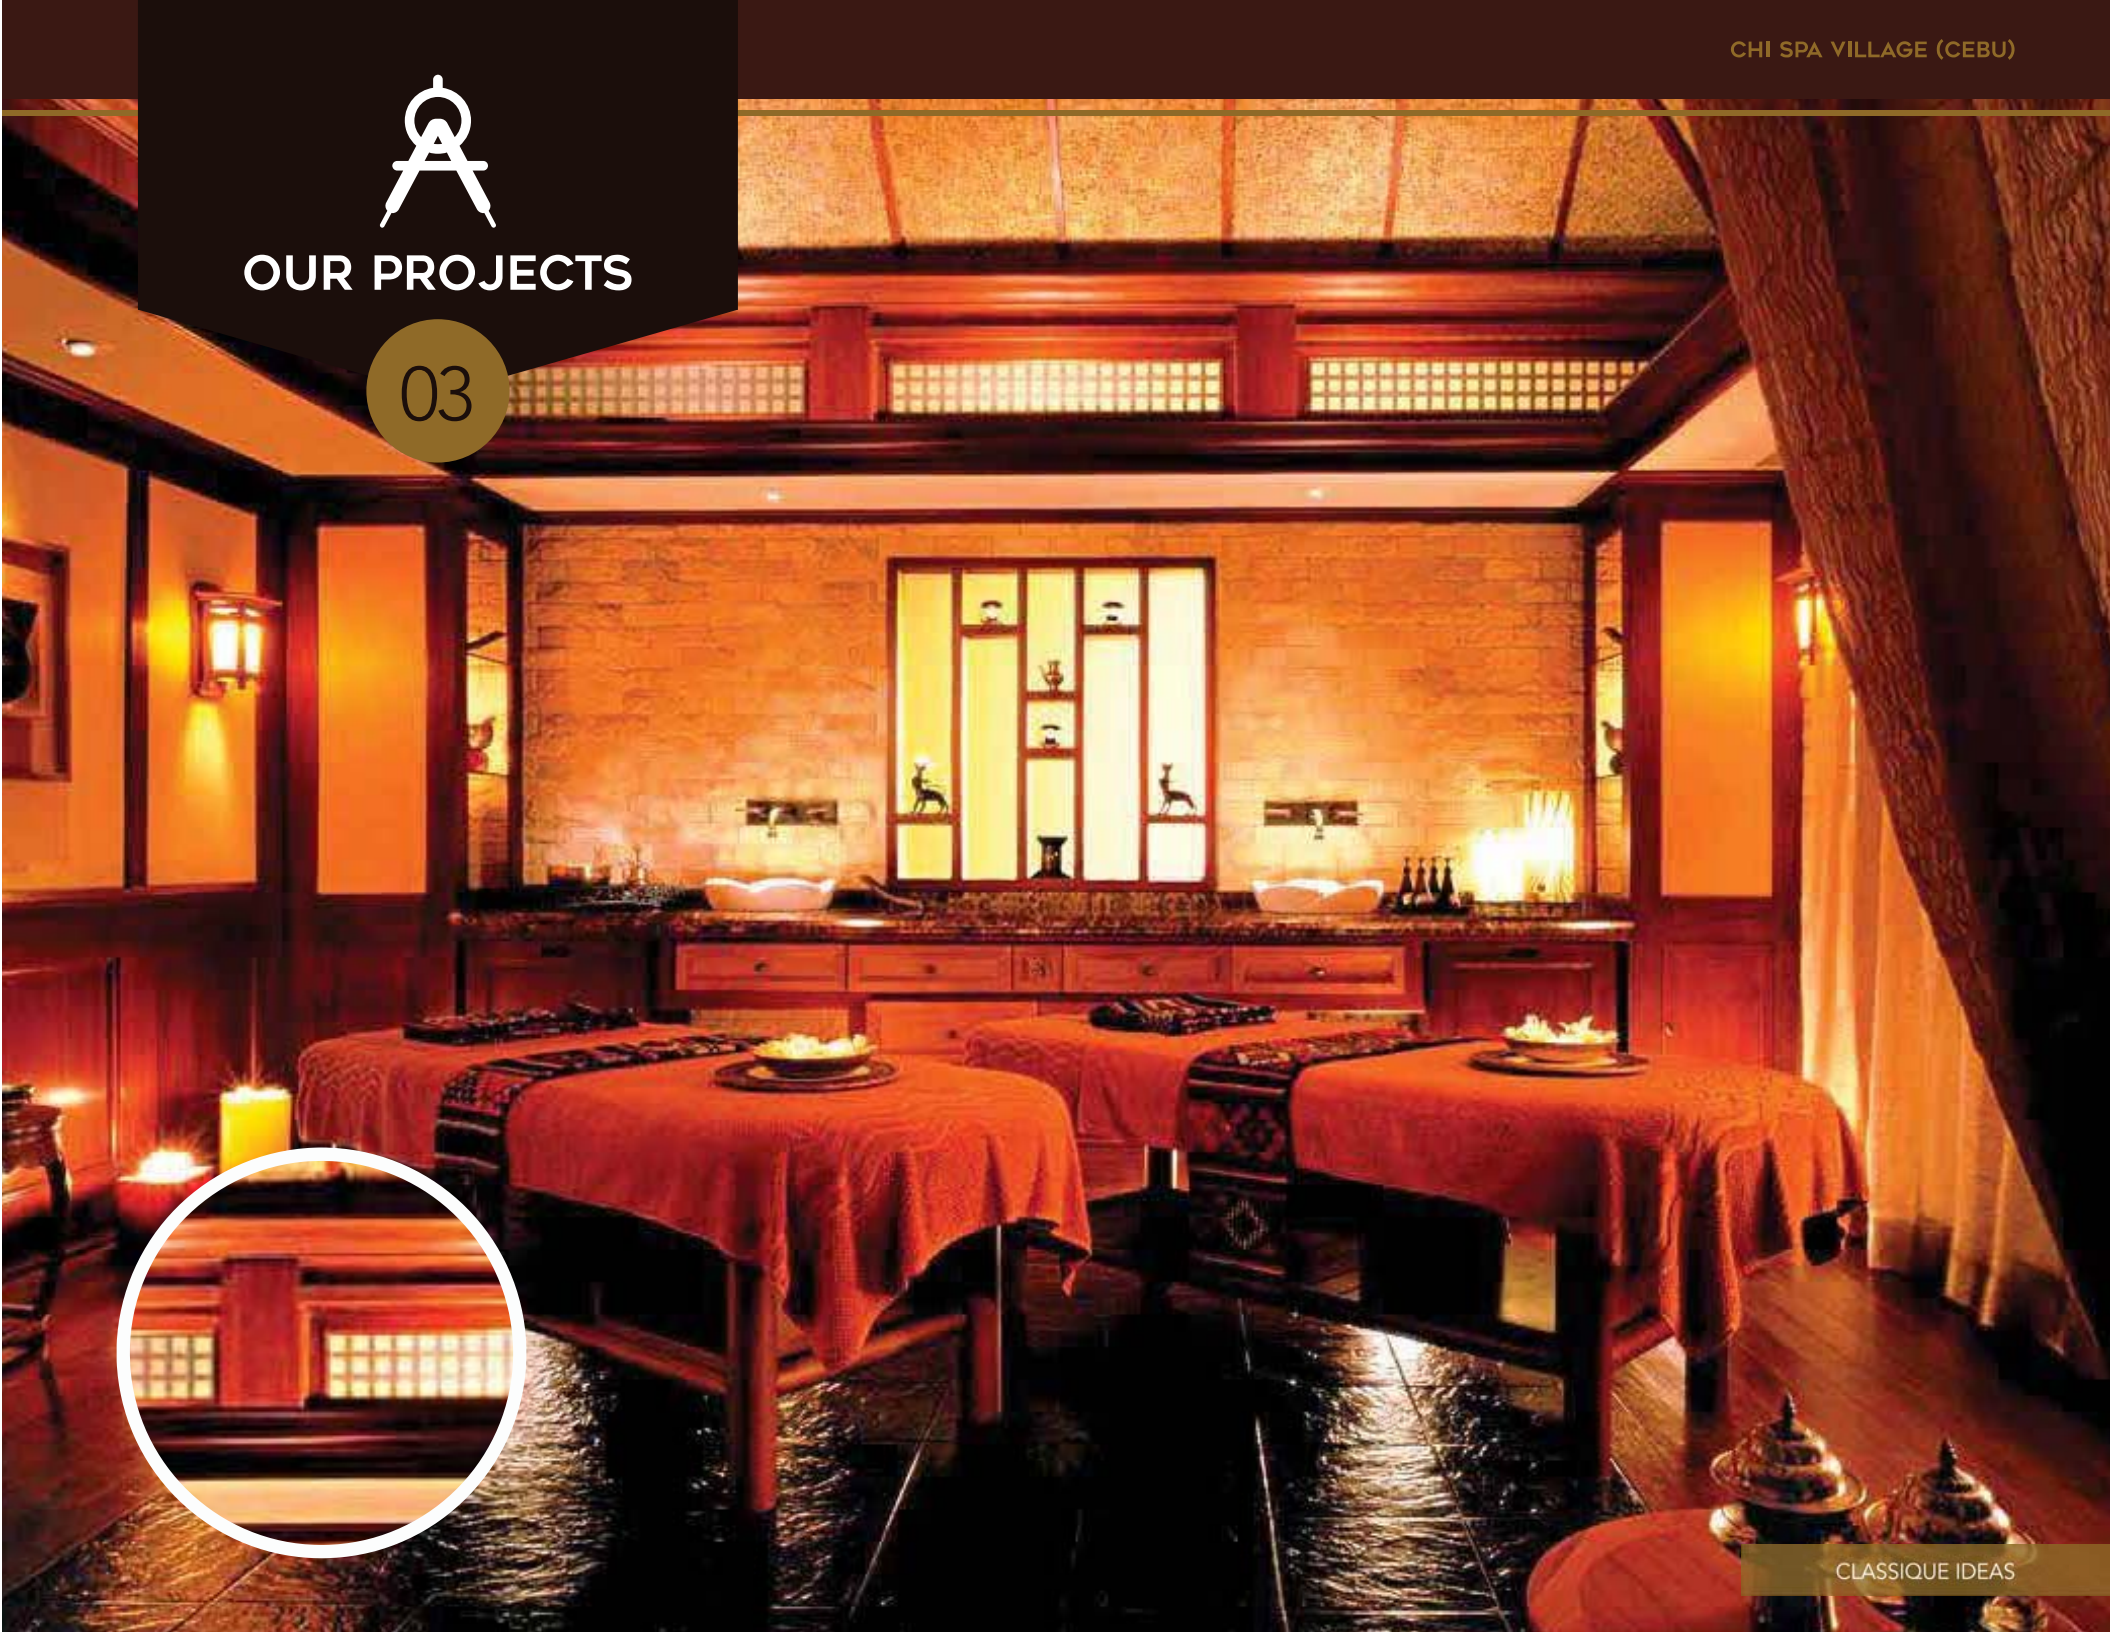

▶ The treatment room features the high triangular ceiling made of wood wool fiber in gold finish bordered with wood slats in stain finish

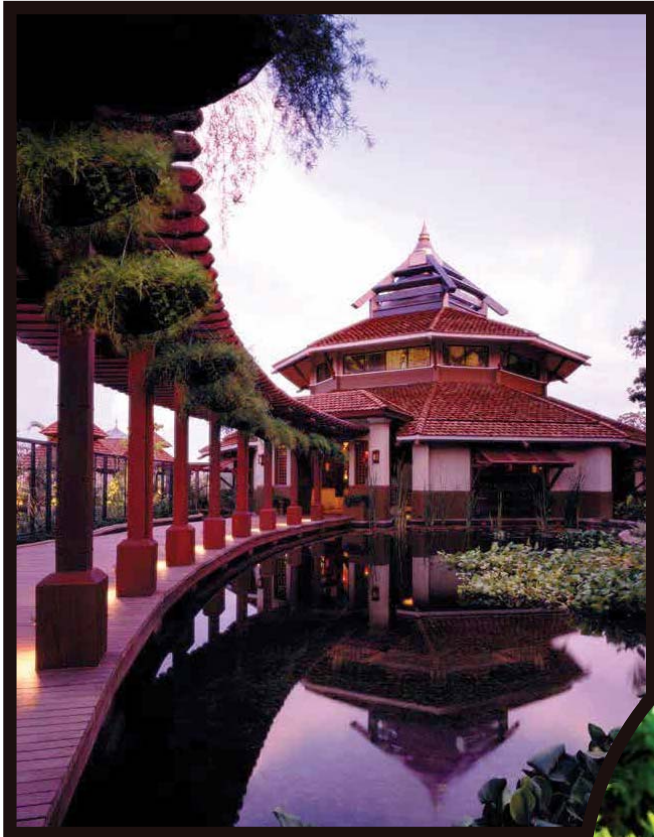

OUR PROJECTS

03
